SUMMARY

Computer Science undergraduate passionate about building user-centric digital products that solve real-world problems. Skilled in product strategy, user research, data-driven decision-making, and cross-functional collaboration. Experienced in translating customer needs and business requirements into intuitive product experiences while balancing user value and business impact.

EXPERIENCE

Product & Design Intern

CIFRAA (Startup Project)

February 2026 – May 2026, Remote

- Contributed to the development of a fintech platform by defining user-centric product experiences that simplify mutual fund discovery and investment decisions.
- Collaborated with founders, designers, and engineers to translate business objectives and user needs into intuitive product features and scalable workflows.
- Conducted competitor analysis, user research, and market benchmarking to identify product opportunities and inform feature prioritization.
- Improved user journeys, navigation flow, and information architecture, enhancing usability and creating a seamless experience across web and mobile platforms.
- Worked closely with engineering teams to implement product requirements, maintain design consistency, and deliver responsive, high-quality user experiences.

PROJECT

Nagriksetu

- Identified the challenge of inefficient civic issue reporting and helped design an MVP focused on transparency and community participation.
- Prioritize product features based on user needs and expected impact, including location-based reporting, issue tracking, and community-driven visibility.
- Collaborated with developers to translate product requirements into a scalable, user-friendly solution with accessible workflows.
- Improved the end-to-end user journey by simplifying reporting, increasing engagement, and reducing friction in the issue submission process.

UrbanPulse

- Identified the need for simplified environmental monitoring and designed a product that delivers real-time weather, air quality, and city condition insights.
- Prioritized core product features, including interactive dashboards, personalized recommendations, and location-based analytics, to maximize user value.
- Translated user needs into intuitive data visualizations, improving information accessibility and enabling faster decision-making.
- Collaborated across design and development to deliver a scalable, user-focused experience while emphasizing usability and product quality.
